

As a PAYING listener to XM Radio I enjoy having such benefits as Instant traffic and weather at my fingertips. Since the very first day I heard XM was available I wanted it because I felt it offered a new level of service and quality. XM offers so much more than standard AM/FM radio such as CD quality sound, diverse musical programming, and talk shows. It should be up to the people who pay for these services to determine what types of programs are available, we want it, we will pay for it. PLEASE reject the NAB's petition 04-160 and the Bill in the House of Representatives: HR 4026. If you really want to represent us, you will reject this bill.
